

SAHIL SURENDRA DESHMUKH

AI/ML Engineer

sahidesho2@gmail.com | 9766545836 | Thane, India [LinkedIn Profile](#) | [GitHub Profile](#)

SUMMARY : A passionate Computer Engineering graduate with expertise in Python, C#, and Java. Proven experience in developing AI/ML solutions, including biometric recognition and automated management systems. Certified in Data Visualization and Advanced Python, with strong leadership skills developed as an NSS leader.

TECHNICAL SKILLS

- **Programming:** Python (NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch), C#, Java, HTML, PHP
- **AI/ML:** Regression, Decision Trees, Random Forests, SVM, K-Means, XGBoost
- **Data Science:** Feature Engineering, Data Preprocessing, Data Visualization (Matplotlib, Seaborn, Plotly)
- **Tools & Deployment:** Flask, Streamlit, OpenCV, GitHub
- **Devops :** Apache Web Server (Application Hosting & Configuration), Linux, Apache, Hosting

PROFESSIONAL EXPERIENCE

AI/ML Engineer | Upskill Tech Solutions (Skills Connect) Sep 2025 – Present | Mumbai, India

- Developing and maintaining **AI/ML solutions** for real-world applications.
- Solving complex problems using **analytical and machine learning techniques**.
- Gained hands-on exposure to **DevOps fundamentals** and project deployment processes.
- Deployed and hosted applications on a **Linux server using Apache Web Server**.

AI/ML Intern | Upskill Tech Solutions (Skills Connect) Jun 2025 – Aug 2025 | Mumbai, India

- Gained hands-on experience in machine learning model development and data handling.
- Collaborated on real-world system implementations and software solutions.

Data Scientist Intern | [Dezignolics Web & Software Company](#)

July 2025 – August 2025

- Conducted data collection and preprocessing to ensure data integrity.
- Performed exploratory data analysis (EDA) using Python libraries, identifying key trends and insights.
- Developed predictive models with machine learning algorithms, focusing on model training and validation.
- Created visualizations and reports to communicate findings to stakeholders effectively.

PROJECTS

Face and Iris Based Attendance System (Deep Learning)

- Developed a Python-based desktop application to automate attendance using facial and iris recognition.
- Implemented OpenCV and machine learning algorithms for precise biometric identification.
- Engineered real-time data capture, secure storage, and automated reporting modules.

Salon Management System (C# / .NET)

- Developed a C# desktop application to streamline end-to-end salon operations.
- Engineered modules for customer management, appointment scheduling, and billing using OOP principles.
- Designed an intuitive user interface (UI) to ensure seamless navigation and data handling.

EDUCATION

Qualification	Institution	Duration
B.E. in Computer Engineering	G.V. Acharya Institute of Engineering and Technology, Mumbai University	Feb 2022 – May 2025
Diploma in Computer Engineering	G.V. Acharya Polytechnic, Shelu	Feb 2020 – Jun 2022
SSC (10th Standard)	K.E.S. English Medium School, Karjat	May 2018
